## testo 340

Speed, power \& precision in industrial combustion analysis.

## The testo 340 Portable Combustion Analyzer

Speed, power \& precision in combustion analysis.

Optimizing the combustion process and increasing fuel efficiency are necessary to compete in today's market. The testo 340 is the ideal tool o confirm proper set-up and to identify emission problems before the get serious.

The Ultimate Portable Combustion Tuner

- 4-gas flexibility in a rugged, compact handheld design
- Multi sensor capability, equipped to handle extreme concentration working longer
Designed for simple, fast operation and constructed for daily rugged use!

Replaceable Sensors and Filters
ligh concentrations can reduce the normal life span of sensors. Testo's solution is field-replaceable sensors. Other gases in the sensor filters on the CO and NO sensors eliminate the interferences.
assure filter readiness, advanced analyzer diagnostics show filter fetime in ppm hours. This lets you know when to change out the ter. This simple change-out increases accuracy and extends sen lifetime.
ombustion Analysis that you can count on
Plug and play sensor technology lets you change or add sensors within seconds in the field, eliminating costly down-time and giving you maximum tuning flexibility.

Oxygen comes standard, then simply add one, or up to three, sensors for your job.
Select from:

- co orco
- NO or NOiow
- NO2

SO2 (For the lower concentrations, select $\mathrm{CO}_{\text {ou }}$ or $\mathrm{NO}_{\text {ow instead }}$

## Get the job done right..

Unique Feature - Dilution System Option
The testo 340 is built to measure high concentration with its unique, automatic 5 X dilution system. When the concentration set-point is reached, precise amounts of dilution air are added thereby lowering
the concentration applied to the sensor. The analyzer automatically analyzer automatically
computes and displays the correct values.
Simply install the sensors in the dilution slot for a range 5 times greater. It's that simple.
more flexibility select "dilution overall"
to extend the range of all sensors by a factor of 2 .
The dilution system, combined with replaceable filters will maximize your tuning
the cost of ownership.

## CO concentrations

Built to Last
Testo analyzers are known for their reliability and staying power in the industry. The testo 340 is no exception with its simple to use interface, and durability that can withstand the most rugged field
environments. All testo 340 s are equipped with:
Widest testing range in its class
Easy to read, back-lit displays

- User-defined option to see only the parameters that matter
- Simple function keys to navigate throughout the menu

Rubberized shock-resistant housing
Integrated magnets for hands-free operation

- Durable transport case

## Onboard Diagnostics

The information button is knowledge at your fingertips.
Simply push the " $i$ " button and scroll to the diagnostics screen to see instrument status.
For example:

- Perform an automated quick leak check before your test

See the rechargeable lithium battery status (lasts approximately 6 hours with pump on)
Review the pump flow rate (liters/min)

- Show error status with description and diagnosis and last service/maintenance date
- Display graphic representation of sensor calibration data
- Shows status of water in condensate trap

## More features

ntegrated pressure senso
Measure draft or differential pressure

- Simultaneously measure exhaust gas and flow velocity

8 fuels to choose from, plus...
10 - user defined fuels (input from easyEmission)
infrared printing

- Display and print calibration record with sensor graphics
- Print records to infrared printer (10 year thermal paper)

Simply push the "i"" button and Simply push the "i" button and
scroll to the diagnostics screen

The Ultimate Combustion Tuner

Better combustion analysis for industrial processes Combustion analyses in industrial processes vary widely. With the optional dilution system, the measurement of extreme concentration
(i.e. SO2 or NOX) is easily measured. High temperature sampling with long industrial probes can easily be added. The testo 340 is truly an analyzer designed as your industrial workhorse.

## Better engine tuning

Stationary engine exhaust, when uncontrolled, can have very wide concentration ranges. As a result both CO and NO 2 can fluctuate
significantly. The on-board dilution system and the replaceable interference filters both keep the sensors secure and your readings accurate. The unit measures both NO and NO2 for perfect lean burn engine set-up. High exhaust pressures and heavy particulate loading are easily controlled with the special pressure relief valve (standard) and particulate filters (option) on the Engine Probe kit configuration.

## Better boiler and burner tuning

The automatic dilution feature will reduce the CO concentration when your system spikes and CO goes through the roof. The analyzer and removing the probe from the stack, just hit the fresh air button. Automatic calculations (CO2, efficiency, excess air) provide fast tuning data. The standard differential pressure measurement is ideal to monitor or set up draft or draft induction or velocity for the calculation of mass emissions.

## Data Management

internal data logging - automatic programs解 on-board logging programs. Select from 5 user-defined needed. Program duration is limited by concentration. At low concentrations, data log up to 2 hours!
internal Memory Management
Up to 100 folders (customers/systems) can be saved
Up to 10 sites can be saved in every folder

- USB Interface

Transmit data via infrared or Bluetooth

4

## easyEmission

Have total control of your 340 with the easyEmission software package. Display screens can be customized to match commonly used functions. Prepare custom reports. With dynamic graphing features, it provides trending analysis like no other instrument
in its class.

- Real-time analyzer control with a PC, showing tabular, graphical and picture box results
- Logging intervals $1 / \mathrm{sec}$ to $1 / \mathrm{hr}$
- Custom report generation
- Import/export data into a variety of formats

## Probes for every application

The probe and hose assemblies are made from the highest quality materials. The standard hoses (Teflon ${ }^{\otimes}$ lines) are heat-resistant. The lengths vary from 12 inches to 28 inches with temperatures to $1800^{\circ}$ and hoses that can extend to 25 feet.
Standard probes are specially des
boiler applications
Industrial probes with lengths to 9 feet and temperatures to $3200^{\circ} \mathrm{F}$ give you extreme tuning flexibility

Technical data

| Measurement | Measurement range | Accuracy |
| :---: | :---: | :---: |
| $\mathrm{O}_{2}$ | 0 to 25 Vol.\% | $\pm 0.2 \mathrm{Vol}$. \% |
| CO $\left(\mathrm{H}_{2}\right.$ compensated) | 0 to 10,000 ppm | $\pm 10 \mathrm{ppm}$ or $\pm 10 \%$ of mv ( 0 to 200 ppm ) $\pm 20$ ppm or $\pm 5 \%$ of mv (201 to $2,000 \mathrm{ppm}$ ) $\pm 10 \%$ of mv ( 2,001 to $10,000 \mathrm{ppm}$ ) |
| $\mathrm{CO}_{\text {low }}$ <br> ( $\mathrm{H}_{2}$ compensated) | 0 to 500 ppm | $\pm 3 \mathrm{ppm}$ ( 0 to 39.9 ppm ) $\pm 5 \%$ of mv (remaining range) |
| NO | 0 to 3,000 ppm | $\pm 5 \mathrm{ppm}$ (0 to 99 ppm ) <br> $\pm 5 \%$ of mv (100 to $1,999 \mathrm{ppm})$ <br> $\pm 10 \%$ of mv (2,000 to $3,000 \mathrm{ppm}$ ) |
| $\mathrm{NO}_{\text {ow }}$ | 0 to 300 ppm | $\pm 3 \mathrm{ppm}$ (0 to 39.9 ppm ) $\pm 5 \%$ of mv (remaining range) |
| $\mathrm{NO}_{2}{ }^{*}$ | 0 to 500 ppm | $\pm 10$ ppm (0 to 199 ppm) <br> $\pm 5 \%$ of mv (remaining range) |
| $\mathrm{SO}_{2}{ }^{*}$ | 0 to 5,000 ppm | $\pm 10 \mathrm{ppm}$ ( 0 to 99 ppm ) <br> $\pm 10 \%$ of mv (remaining range) |
| Temperature <br> Probe Type K (NiCr-Ni) | $-40^{\circ}$ to $2,192{ }^{\circ} \mathrm{F}$ | $\begin{aligned} & \left. \pm 0.9{ }^{\circ} \mathrm{F} \text { (32 to } 210.2^{\circ} \mathrm{F}\right) \\ & \pm 0.5 \% \text { of mv (remaining range) } \end{aligned}$ |
| Draft | -0.58 to 0.58 psi | 0.0004 psi (-0.043 to 0.043 hPa$)$ $\pm 1.5 \%$ of mv (remaining range) |
| Differential pressure | -2.9 to 2.9 psi | 0.007 psi (-0.724 to 0.724 psi) $\pm 1.5 \%$ of mv (remaining range) |
| Absolute pressure | 8.7 to 16.68 psi | 0.14 psi |
| Calculated parameters: <br> Efficiency <br> Flue gas loss <br> Flue gas dewpoint | 0 to 120\% <br> 0 to $99.9 \%$ <br> $0^{\circ}$ to $211^{\circ} \mathrm{F}$ |  |
| $\mathrm{CO}_{2}$ measurement (calculation from $\mathrm{O}_{2}$ ) | 0 to $\mathrm{CO}_{2}$ max. | $\pm 0.2$ Vol. \% |

General technical data

| Memory | Maximum: 100 folders <br> Per folder: Max. 10 sites <br> Per site: Max. 200 logs <br> The max. number of logs is determined by the number of folders or sites |
| :---: | :---: |
| Sample pump | Pump flow: $1.0 \mathrm{l} / \mathrm{min}$ <br> Hose length: max. 25 feet ( 2 hose extensions and 1 probe hose) <br> Max. pos. pressure/flue gas: 0.73 psi <br> Max. neg. pressure/flue gas: -2.9 psi |
| Weight | 2.12 lbs |
| Dimensions | $11.14 \times 4.05 \times 2.56{ }^{\prime \prime}$ |
| Storage temp. | $-4^{\circ}$ to $122{ }^{\circ} \mathrm{F}$ |
| Oper. temp. | $23^{\circ}$ to $122{ }^{\circ} \mathrm{F}$ |
| Power supply | Battery 3.7 V/2.4 Ah, AC Power Supply 6.3 V/2 A |
| Protection class | IP40 |
| Warranty | Analyzer: 2 years (excluding working parts, e.g. sensors, sensor replacement filter) Rech. batt.: 1 year <br> Sensors: $\mathrm{CO}, \mathrm{NO}, \mathrm{CO}_{\text {low, }}, \mathrm{NO}_{\text {low }}, \mathrm{NO}_{2}, \mathrm{SO}_{2}$ : 1 year <br> $\mathrm{O}_{2}: 1.5$ years |

## Measuring range extension

| Single dilution, factor 5 (standard) |  |  |
| :---: | :---: | :---: |
| CO <br> ( $\mathrm{H}_{2}$ compensated) | Meas. range Accuracy | 700 ppm to 50.000 ppm <br> $\pm 10$ \% of mv (additional error) |
| $\mathrm{CO}_{\mathrm{ow}}$ <br> ( $\mathrm{H}_{2}$ compensated) | Meas. range Accuracy Resolution | 300 ppm to 2.500 ppm <br> $\pm 10 \%$ of mv (additional error) <br> 0.1 ppm |
| No | Meas. range Accuracy | 500 ppm to 15.000 ppm <br> $\pm 10 \%$ of mv (additional error) |
| $\mathrm{NO}_{\text {iow }}$ | Meas. range Accuracy Resolution | 150 ppm to 1.500 ppm <br> $\pm 10 \%$ of mv (additional error) <br> 0.1 ppm |
| $\mathrm{SO}_{2}$ | Meas. range Accuracy | 500 ppm to 25.000 ppm $\pm 10 \%$ of mv (additional error) |

| Single dilution, factor 5 (Option - Part no. 0440 3350) |  |  |
| :---: | :---: | :---: |
| $\mathrm{O}_{2}$ (With dilution over all sensors) | Meas. range <br> Accuracy <br> Resolution | 0 to 25 vol.\% <br> $\pm 1$ vol.\% additional error (0 to 4.99 vol.\%) $\pm 0.5$ vol. \% additional error ( 5 to 25 vol. $\%$ ) 0.01 vol.\% |
| $\mathrm{CO}_{\mathrm{ow}}$ <br> ( $\mathrm{H}_{2}$ compensated) | Meas. range Accuracy |  |
| $\mathrm{CO}_{\text {ow }}$ <br> ( $\mathrm{H}_{2}$ compensated) | Meas. range Accuracy |  |
| NO | Meas. range Accuracy |  |
| $\mathrm{NO}_{\text {Iow }}$ | Meas. range Accuracy |  |
| $\mathrm{NO}_{2}$ | Meas. range Accuracy |  |
| $\mathrm{SO}_{2}$ | Meas. range Accuracy |  |

## Other combustion solutions from Testo

## testo 350

Multi-Gas Portable Emission Analyzer
The testo 350 multi-gas emission analyzer provides the high performance and rugged portability for emission monitoring and regulatory compliance.

## testo 330-2G LL <br> Three-Gas Analyzer

The 330-2G LL measures O2, CO, optional NOx, tempeature, pressure, and other combustion parameters. Proper set up and maintenance are critical to safe and efficient equipment operation.

## testo 320 <br> Single-Gas O2 Analyzer

The 320 is perfect for basic tuning. Use it to set up and commission combustion systems.
